SUMMARY

I'm a digital craftsman driven by curiosity and a love for creating with tech. Started young with PC tools and Android modding, I developed expertise in web development, graphic design, video editing, and CMS administration through my teenage years. Recently, I've focused on programming in Python and Go, merging my creative background with technical skills to build intelligent, useful, and user-focused digital experiences.

EXPERIENCE

Graphic Designer

Freelance/ 2021-2022

- Created social media visuals, posters, and brand assets. Developed a strong foundation in design principles, composition, and color theory.

Video Editor

Freelance / 2022 - 24

- Edited short-form content and promotional videos using modern tools. Focused on storytelling, pacing, and visual aesthetics.

CMS Manager

Mars Brokers, UAE / 2025-2025

- Managed property listings for Mars Brokers, ensuring accurate and up-to-date information across their UI. Handled data entry and quality control to streamline property presentation for clients.

Web Developer & Programmer

Independent Learning/ 2024-Present

- Developed hands-on experience in front-end and back-end development using HTML, CSS, JavaScript, Python, and Go. Built and tested small web and automation projects.

Worked on several confidential projects under NDA.

SKILLS

GFX, Visual Communication	
Static Web Development	
Video Editing	
Python, Golang	
Adaptability
